

## MATERIALS

Everything in the world is made from a different material and there are lots of different materials.

Here are just a few:

### Wood

### Metal

### Plastic

### Glass

### Water

## Year 1 Summer Term

### EVERYDAY MATERIALS

#### WHAT ARE MATERIALS LIKE?

All these materials can be described in different ways. Some are:

hard

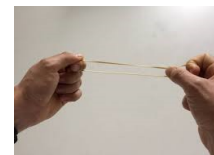

shiny

bendy

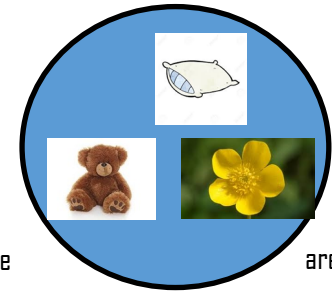

soft

## OLSE Science Knowledge Organiser

#### SORTING MATERIALS

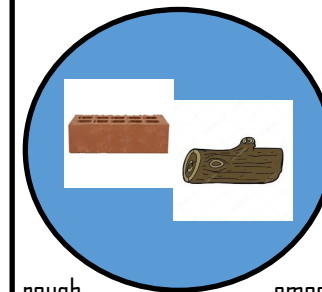

We can sort materials into different groups if we look carefully at what they are like. Some things can go together.

These

are all **soft**.

But other things need to go in different groups.

rough

smooth
