

# SOURCES OF SOUND

Sound can come from many different **sources**. We can sort these sources into 2 groups. Some sources are natural like

waves

wind

volcanoes animals

Other sounds are manmade such as

planes washing machines

# Year 2 Summer Term SOUND

## DESCRIBING SOUND

We can use different ways to describe sound. It can be:

loud or quiet

high or low

# OLSE Science Knowledge Organiser

## VOLUME

If a sound is too loud, we can always walk away because sound gets quieter as you move further away from the source.

You can also make the sound quieter by putting something on your ears to muffle the sound.

## MAKING SOUNDS

Sounds can be made in different ways.

You

can use your own body

or

play an instrument.
